INTRA SHIELD

IV CANNULA DRESSING

INTRA SHIELD® GS-3045

- Transparent water proof PU Dressing for I.V. Cannula
- Acts as a barrier to external contaminants and prevents infection.
  High water vapour transmission permeability prevents moisture build up, thereby reduces the risk of skin maceration.
- Keeps the cannula penetration site secure, clean and tidy.
- Transparent dressing allows convenience of visual inspection of the cannulation site.
- Hypoallergenic, skin friendly adhesive firmly holds the I.V. cannula in place.
- Gentle to skin. Easy to remove after use.
- Sterile, individually packed in peel open pack.

AVAILABLE OPTIONS

GS-3045L

- Non-woven reinforced PU transparent Dressing with flip-up tab for easy and quick fixation and securement of large catheter's cannulation sites e.g. Central Venous Catheter
