CAMERA COVER

We offer an extensive range of covers to suit most requirements such as video and universal camera coverage. Our disposable camera cover provides a leak-free sterile barrier widely used for arthroscopic and endoscopic applications. This canister-style drape slides easily into position, with minimal contamination risk from surgical site infections (SSI).

- Manufactured with top-of-the-line SMS fabric, ensuring high barrier performance.
- Flame resistant for use around lasers and other electrical instruments.
- Tear-resistant, abrasion-free and resistant to strikethrough from alcohol, with secure attachment for line and tube.
- Low linting property to reduce the risk of aerial transmission of bacteria in the operating room.
