- Validated in house EO sterilization and eligible to sterile as per ISO 11135

Surgical Drapes & Packs

Surgical drapes are designed to establish and maintain a sterile field. It is very important to select a surgical drape that provides reliable performance. To achieve the best surgical outcomes look for surgical drapes with qualities like impervious to strike through, fluid control feature, reliable adhesion, superior strength and comfort.

DESIGN

Plavus drapes are designed, folded and packed as recommended by The Association of Perioperative Registered Nurses (AORN). Clearly labelled instructions on all drapes to facilitate correct, asceptic and fast application. Wider anaesthesia screen and arm board cover to drape a person from fingertip to fingertip.

REINFORCEMENT

Large impervious reinforcement zone surrounded with fenestrations & splits of each drape. Our reinforcement fabric is highly absorbent to absorb fluids blood and is plastic backed. All Plavus reinforced zone pass ASTM F 1671.

FLUID CONTAINMENT

In build pouches offered in selected drapes to collect & contain blood and body fluids, minimising the risk of explosure. Pouches also allow for efficient, easy clean up & fluid management.

ADHESIVE & INCISE

We use premium quality, skin friendly adhesive tape to secure drapes in place without compromising barrier integrity. Incise is included in many procedural drapes such as C-section drape, craniotomy drape, open heart drape etc.

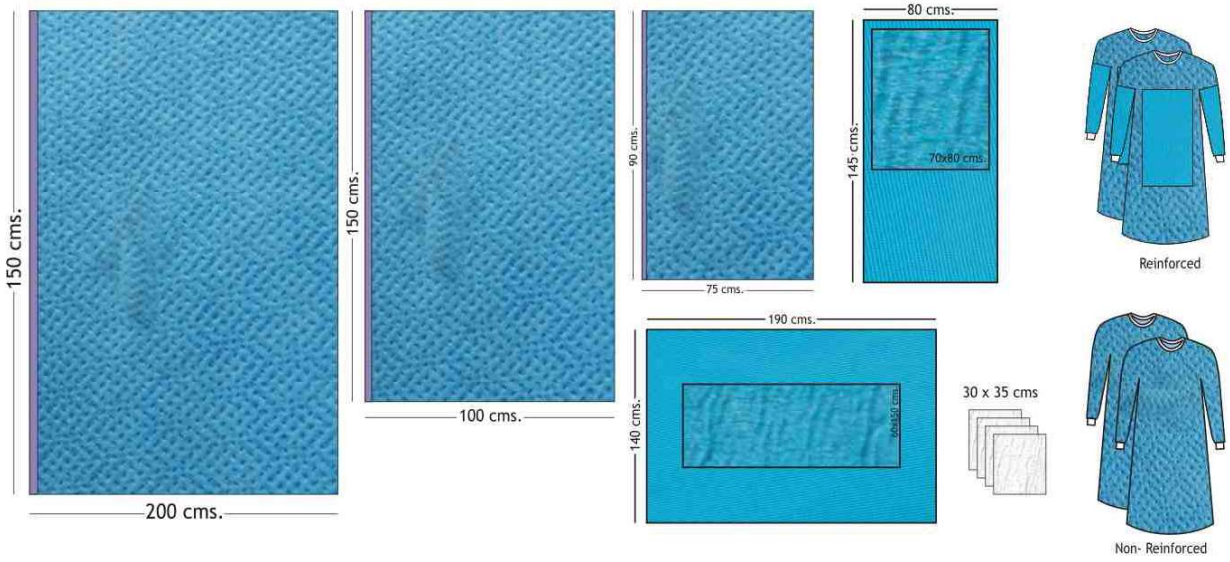

TUBE & LINE HOLDERS

Plavus drapes features Velcro style tube and line holders to place surgical lines and tubes and helps keep them clear of the fenestration.

CHOICE OF FABRICS

In Plavus you have a choice of surgical drapes and packs in different fabrics available as SMMS, Spunlace, Trilaminate without any compromise in quality.
