SURGICAL GOWNS

Designed by you for high level or perfection & comfort

SURGICAL GOWN

Designed for Safety, Comfort and Flexibility

Our surgical gowns are known for their excellent properties of flexibility, comfort and safety. Keeping in mind varied requirements of surgeons we offer surgical gowns in five different styles and various sizes, using a combination of various fabrics, each with distinctive properties as regards end use, protection and comfort.

We do not skimp on use of materials and in each size, the proportions of chest, shoulder, arms and waist are given generous allowances to allow comfort, freedom of movement and good fit. Each gown has a velcro neck closure for easy adjustment to any neck size while offering total seal against fluid splashes at the front due to gapless construction.

The outstanding protective feature of our surgical gowns is that all seams are ultrasonically welded for absolute protection and strength. Another feature is the use of low lint materials to reduce risk of contaminating open wounds or the atmosphere in the operation room. A third feature is that we use materials with inherent low flammability characteristics conforming to CPSC16CF part 1610 standards.

Surgical Gowns Carrying Our Brand Conform to EN13795 and BIS 173334 Standards and Meet and/or Exceed the Latest Recommendations From AAMI

SURGICAL GOWN

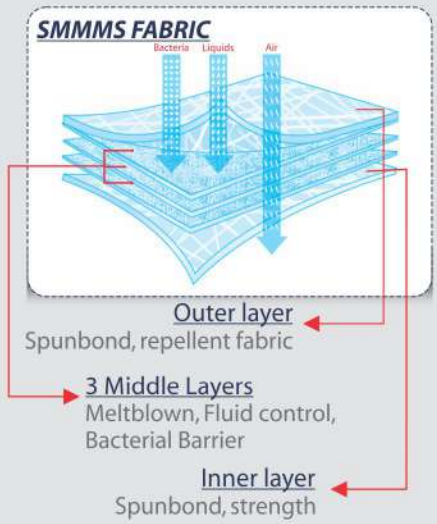

BOND

- Excellent combination of protection, comfort and economy.
- Hydro head performance (more than 50 cms.) means better protection for staff and patient
- Lower infection risk due to cleanliness, Virtually no lint
- No clinging to scrubs or drapes no static electricity due to Antistatic treatment
- Consistent performance and simplified logistics when compared to reusable products
- In compliance with AAMI PB 70 and EN 13795 standards.

Right Balance Between Performance and Comfort

This type of surgical gown is made of five layer SMMMS fabric for maximum protection against ingress of bacteria, virus and fluids. The outermost layers are liquid repellant spunbond fabric with the three inner layers comprised of meltblow, provide high level of fluid repellency. Extreme breathable and light weight, allows ease of use, comfort and full protection

SURGICAL GOWN

COMFORTO

- advanced material technology that provides a splash resistant barrier that's breathable
- It keeps you cool and comfort- able while you work, helping you feel confident and in control
- surgical procedures of moderate duration involving moderate amounts of body fluids and moderate risk of infection.

Made of polyester reinforced cellulose non woven.

The extreme softness provide cotton cloth feel. This has been regarded the most comfortable, skin friendly and breathable and is optimal for physically demanding procedures. The material also allows for efficient heat exchange.
