Intended for short term continuous anaesthesia & pain therapy during surgeries and clinical care settings.

EPI KIT

EPI KIT GS-2026

Epidural kit consists of :

- **Epidural/ Tuohy Needle:** Provided with clear depth markings for accurate placement and polished inner bevel edge to minimize the risk of catheter shearing.
- **Epidural Catheter:** Closed, rounded tip with three lateral eyes and precise length markings. Passes through NG 16 & 18.
- **LOR Syringe :** Suitable for use with air/ saline technique to ensure the clear identification of the epidural space.
- **Threading Assist Guide:** Fits securely into epidural needle & assists in easy catheter advancement.
- **Detachable Connector:** Separate twist and lock connector for connection.
- **Fluid Filter:** 0.2 micron filter offers additional safety & control against microbial infections.
- **Filter Fixator:** To secure fluid filter in place.
- **Transparent Dressing:** To secure the catheter.

- Sterile, individually packed in Blister tray.
- Box of 1/ Master box of 50.
