SIZE	TUBE LENGTH
Adult, Child	210 cm

FLEXI MASK® GS-2020

- Molded PVC mask with soft edges, in-built nose bridge & adjustable elastic strap.
- 360° swiveling connector provides effortless oxygen access regardless of patient positioning.
- 210 cm long multichannel, kink-resistant tube ensures continuous flow of oxygen.
- Soft funnel shaped ends ensure secure connections to oxygen source.
- Non-sterile, Individually packed. Master Box of 50.
- Available Options : With Metallic Nose Clip

FLEXI COMFORT™ GS-2401

- Made from lightweight, odour-free, medical grade PP.
- Soft, anatomical cushioned mask for an optimal seal, reducing oxygen wastage.
- Strategically placed exhaust ports minimize "blind angles" and limit the rebreathing of exhaled air.
- Eliminates pressure points on the facial nerves, allowing for extended wear.
- No metal clip. MRI Compatible.
- 210 cm long kink resistant tube.
- Non-sterile, Individually packed. Master Box of 50.
