E.C.G. ELECTRODES

DISPOSABLE ELECTRODES

Disposable electrodes intended for ECG procedure to capture the pattern of heart-beat to diagnose the health of the heart.

E.C.G. ELECTRODES

E.C.G. ELECTRODES GS-9045

- E.C.G. electrodes, white foam type, centered snap with conductive solid gel, ensures quality transmission.
- Increased foam coating per square mm of adhesive ensures secure placement even under diaphoretic and stress conditions.
- Ensures optimal skin contact in high-moisture conditions where adhesion typically fails, such as Holter Monitoring.
- Solid gel electrodes eliminate the mess of liquid gels, while still offering low impedance.
- Proprietary solid gel retains aqueous content within a polymerized hydrogel formulation, ensuring good body contact and ease of fixation.
- High performance, medical grade adhesive for superior adhesion.
- Hypoallergenic, latex free, non-irritating, for maximum patient comfort.
- Meets and exceeds all AAMI performance specifications.
- Non-Sterile. Pack of 60/ Box of 600/ Master Box of 7200.

SPECIFICATIONS	
SIZE	H x W
Standard	45 x 42 mm
