CHEST DRAINAGE CATHETER

THORACIC DRAINAGE CATHETER

An intercostal drain, used to remove air or fluid from the intra-thoracic space post cardiothoracic surgery.

VARIANTS : STRAIGHT/ ANGLED

GS-5010 / GS-5034 (Straight)

GS-5011 (Right-angled)

CHEST DRAINAGE CATHETER® GS-5010

- Straight chest tube with open distal end & super smooth large eyes to maximize the drainage.
- Proximal end is fitted with specially designed tapered tongue to provide excellent forceps grip and non-traumatic insertion.
- Catheter is marked at every 2 cm to ascertain placement.
- Matching size spare connector facilitates easy connection to drainage system.
- Dark green line for x-ray detection. Total Length: 45 cm
- Sterile, individually double packed in peelable pouch.

FLEXO CATH® GS-5034

- Sterile, Straight Chest Tube, made with extra soft DEHP-free medical grade PVC.
- Gentle to the body tissue.

CHEST DRAINAGE CATHETER® ANGLED GS-5011

- Sterile, Right angled catheter for thoracic drainage from the deeper sites of the pleural cavity.
