ROMO VAC SET

CLOSED WOUND DRAINAGE SYSTEM

Intended for post-operative management of closed wound drainage to remove exudates through gentle, continuous negative pressure.

VARIANTS : 800 ML/ 500ML/ 400ML/ 50ML

ROMO VAC® SET GS-5002

- Flexible, easy to depress bellow chamber for activating negative pressure.
- Graduated bellow allows to measure the drained volume.
- Kink resistant connecting tube with 'Y' port, allows simultaneous use of one or two catheters.
- Multi-perforated catheter with satin smooth eyes, promotes faster, trauma-free fluid removal without damaging the surrounding tissues.
- Color coded radio opaque line on catheter for x-ray visualization.
- Available in various catheter size with matching curved needle to accumulate minor, moderate or heavy drainage needs.
- Sterile; Individually packed in a Box.

Unit consists of :

- Bellow capacity 800 ml/ 500ml/ 400ml.
- Connecting tube with clamp and “Y” connector.
- Curved needle with matching catheter.
- Spare perforated catheter.
- Available Option : 50ml Bellow Chamber with perforated catheter and matching curved needle.
