URO CATH

FOLEY BALLOON CATHETER

A flexible, indwelling urinary catheter for continuous bladder drainage during surgical procedures & prolonged hospitalizations.

VARIANTS : SILICONIZED LATEX / 100% SILICONE

URO CATH® 2 WAY GS-1072

- Two-way natural rubber latex foley catheter bonded with silicone elastomer, minimizes friction & risk of encrustation.
- Coned distal tip with super smooth, burr free eyes for atraumatic intubation.
- Symmetrical balloon maintains a straight tip for optimal flow & proper sphincter action.
- Non-return hard valve allows smooth inflation/ deflation of balloon.
- Colour coded valve for instant size identification.
- Sterile, Individually packed.
- Size : 06 - 24 FG. Box of 50/ Master Box of 500.

URO CATH® 3 WAY GS-1094

- Three-way natural rubber latex silicone-bonded foley, with extra lumen to allow continuous bladder irrigation.
- Size : 16 - 24 FG. Box of 10/ Master Box of 500.

SILKO CATH® GS-1078

- 100% Silicone 2-way Foley Catheter.
- Preferred for long-term catheterization & patients with latex allergies.
- Size : 8 - 24 FG; Box of 10/ Master Box of 500.
